

Field Operations LLC is seeking full time Senior Landscape Associate

Job Title

Senior Landscape Associate

Job Location

New York, NY; minimum of 3 days in office required with 4th and 5th strongly encouraged.

Duties

Oversee landscape design projects from planning through execution including timelines, budgets, resource allocation, and scope; contribute to business development by preparing proposals and participating in presentations; stay current with industry trends, regulations, and best practices; oversee the creation of innovative designs utilizing BIM systems to develop 3D models, renderings, and visual presentations to communicate design concepts; present design concepts, project updates, addressing concerns and revisions, post-installation support and maintenance recommendations for clients and consultants; conduct site visits to monitor construction progress and ensure design compliance; assign tasks and manage workloads for efficient project execution; supervise and mentor junior staff, providing guidance and feedback; evaluate and select appropriate materials and plant species, integrating sustainable practices; monitor project progress, identify potential issues, implement solutions, and ensure satisfactory completion; coordinate with architects, engineers, contractors, and consultants to integrate designs into overall project plans; and oversee the production of design and construction documentation, ensuring compliance with regulations and standards.

Job Requirements

Must have a Master's Degree in Landscape Architecture, or a related field, plus two years of experience in a Landscape Designer role, and two years of experience using Revit, ArchiCAD, AutoCAD, SketchUp, Rhino, and Adobe Creative Suite.
